No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (27 Congress Street, Salem, Massachusetts 01970), for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1988 articles are as shown on the article title pages; if no fee code appears on the title page, the copy fee is the same as for current articles.

CONTENTS OF VOLUME 36

Number 1, July 1988

MARGARET D. BROWN AND STUART EGGINTON. Capillary Density and Fine Structure in Rabbit Papillary Muscles after a High Dose of Norepinephrine 1

D. M. S. RAGEN, E. E. SCHMIDT, I. C. MACDONALD, AND A. C. GROOM. Spontaneous Cyclic Contractions of the Capillary Wall *in Vivo,* Impeding Red Cell Flow: A Quantitative Analysis. Evidence for Endothelial Contractility 13

EUGENE C. ECKSTEIN, ARNO W. TILLES, AND FRANK J. MILLERO III. Conditions for the Occurrence of Large Near-Wall Excesses of Small Particles during Blood Flow 31

O. MATHIEU-COSTELLO, R. F. POTTER, C. G. ELLIS, AND A. C. GROOM. Capillary Configuration and Fiber Shortening in Muscles of the Rat Hindlimb: Correlation between Corrosion Casts and Stereological Measurements 40

G. L. ANDERSON, R. D. ACLAND, M. SIEMIONOW, AND S. J. MCCABE. Vascular Isolation of the Rat Cremaster Muscle 56

MASAKO SUGIHARA-SEKI AND RICHARD SKALAK. Numerical Study of Asymmetric Flows of Red Blood Cells in Capillaries 64

COLIN B. MCKAY AND HERBERT H. LIPOWSKY. Arteriovenous Distribution of Transit Times in Cremaster Muscle of the Rat 75

DAVID O. DEFOUW, WILLIAM O. CUA, AND FRANCIS P. CHINARD. The Influence of Circulatory Overload on Extraalveolar Microvessel Endothelium of Dog Lung *in Vivo* 92

BRIEF COMMUNICATIONS

MALCOLM W. R. REED AND FREDERICK N. MILLER. Importance of Light Dose in Fluorescent Microscopy 104

LAURENCE T. BAXTER AND RAKESH K. JAIN. Vascular Permeability and Interstitial Diffusion in Superfused Tissues: A Two-Dimensional Model 108

Number 2, September 1988

ANDERS ÖHLÉN, ÅSA THURESON-KLEIN, LENNART LINDBOM, TOMAS HÖKFELT, AND PER HEDQVIST. Substance P and NPY Innervation of Microvessels in the Rabbit Tenuissimus Muscle 117

HIDEO SHIMIZU, NAOHIRO SHINOHARA, AND TAKESHI YOKOYAMA. Topological Analysis of the Three-Dimensional Structure of the Human Renal Glomerulus Using a Computer-Aided Reconstruction System 130

P. J. MACPHEE, E. E. SCHMIDT, P. A. KEOWN, AND A. C. GROOM. Micro-

circulatory Changes in Livers of Mice Infected with Murine Hepatitis Virus. Evidence from Microcorrosion Casts and Measurements of Red Cell Velocity 140

Robert J. Morff. Contribution of Capillary Recruitment to Regulation of Tissue Oxygenation in Rat Cremaster Muscle 150

Johnny B. Delashaw and Brian R. Duling. A Study of the Functional Elements Regulating Capillary Perfusion in Striated Muscle..... 162

Harvey R. Weiss. Measurement of Cerebral Capillary Perfusion with a Fluorescent Label 172

Brief Communications

M. Chiba and K. Komatsu. A Simple Colloid Osmometer and Determination of Some Factors Influencing the Measurement of Colloid Osmotic Pressure in Rat Serum 181

Eric Vicaut and Xin Hou. Evidence of Collateral Circulation in Rat Cremaster Muscle 187

Roger Buchanan, Roger C. Wagner, S. Brian Andrews, and Jørgen Frøkjær-Jensen. Effect of Section Thickness on the Morphological Characterization of the Vesicular System in Endothelial Cells... 191

Announcements 197

Number 3, November 1988

F. M. Hansen-Smith, L. Watson, D. Y. Lu, and I. Goldstein. *Griffonia simplicifolia* I: Fluorescent Tracer for Microcirculatory Vessels in Nonperfused Thin Muscles and Sectioned Muscle 199

Alma Siflinger-Birnboim, Jeffrey A. Cooper, Peter J. Del Vecchio, Hazel Lum, and Asrar B. Malik. Selectivity of the Endothelial Monolayer: Effects of Increased Permeability 216

Sarah D. Gray. Histochemical Analysis of Capillary and Fiber-Type Distributions in Skeletal Muscles of Spontaneously Hypertensive Rats.. 228

Noboru Watanabe, Yasuaki Kawai, and Toshio Ohhashi. Dual Effects of Histamine on Spontaneous Activity in Isolated Bovine Mesenteric Lymphatics 239

Bat-Ami Acad and Harvey R. Weiss. Chemical Sympathectomy and Utilization of Coronary Capillary Reserve in Rabbits 250

Peter S. Gold and Robert A. Brace. Fetal Whole-Body Permeability–Surface Area Product and Reflection Coefficient for Plasma Proteins 262

S. E. Connolly, T. A. Hores, L. E. H. Smith, and P. A. D'Amore. Characterization of Vascular Development in the Mouse Retina..... 275

A. A. van Lambalgen, M. T. E. Rasker, G. C. van den Bos, and L. G. Thijs. Effects of Endotoxemia on Systemic Plasma Loss and Hematocrit in Rats 291

S. P. Sutera, R. G. Tilton, K. B. Larson, C. J. Kilo, and J. R. Williamson.

Vascular Flow Resistance in Rabbit Hearts: "Apparent Viscosity" of RBC Suspensions 305

Information for Contributors

Microvascular Research (MVR) is an international journal dedicated to the dissemination of fundamental information related to the microvascular field.

Submission of Manuscripts. One original and two complete carbon copies should be sent via first-class mail, in flat form, to **Microvascular Research Editorial Office, Dr. David Shepro, 2 Cummington St., Boston University, Boston, Massachusetts 02215.** MVR will not be responsible for manuscripts lost in the mails.

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be nor is presently submitted elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in *Microvascular Research* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Manuscript Style. Papers should be typewritten, double-spaced on one side of the paper, with wide margins. The manuscript should be divided into the following sections: Abstract, Introduction, Materials and Methods, Results, Discussion, References, and Acknowledgments. The abstract, which will precede each article, should be 225 words or less and should be typed on a separate sheet. In addition the manuscript should include, on separate pages, (1) the complete title with names of authors and affiliations (including ZIP CODE), (2) running title, consisting of no more than 40 characters including spaces, (3) key words that are suitable as **Index Descriptors,** and (4) the address to which proofs are to be mailed.

Tables. Tables are to be typed on separate sheets and numbered with Arabic numerals. Each table should contain an explanatory title that would make reference to the text unnecessary.

Figures. These should be numbered with Arabic numerals and should be mentioned consecutively in the text. Legends are to be typed together on a separate sheet.

Illustrations, drawn with a lettering set, should be in finished form ready for photographic reproduction. Lettering on the original drawing should be large enough (minimum, 4 mm) to be legible after reduction to one-third. Graphs should be plotted with black India ink on light blue coordinate paper, no larger than 8.5 × 11 inches, with coordinates properly labeled; grid lines that are to show in the photoreproduction should be inked in black.

Photographs should be submitted as glossy prints and not marred by staples, paper clips, or pencil marks. For best reproduction of halftones, provide clear, sharp photographs with adequate contrast. The best results will be obtained if authors match the contrast and density of all figures appearing on a single plate. If this is not possible, please provide unmounted original art. Providing an overlay that indicates the most critical areas of micrographs will also aid in ensuring high-quality reproduction. The dimensions of the printed page are 5 × 8 in. (127 × 203 mm). It is recommended that micrographs be submitted as near as possible to this size so that large reductions will not be necessary.

Illustrations in color can be accepted only if the authors defray the cost.

Footnotes. These should be designated in the *text* by superscript *numbers* and typed on a separate sheet; in the tables by superscript *letters* and typed at the bottom of the table.

Abbreviations. In general these should follow the usage employed by Chemical Abstracts. The *Style Manual,* 1986, of the American Chemical Society is also an acceptable guide.

References. Citations in the text consist of the author's name, and the year of publication in parentheses. The references should be listed alphabetically and should conform to the following style:

GRAYSON, J., AND LEVESON, M. (1985). Functional and morphological changes in the microcirculation of the dog following acute coronary artery ligation. *Microvasc. Res.* **29,** 161–175.

ALLEN, J. C., AND BUKOSKI, R. D. (1982). Current status of vascular smooth muscle subcellular calcium regulation. *In* "Vascular Smooth Muscle: Metabolic, Ionic, and Contractile Mechanisms" (M. F. Crass III and C. D. Barnes, Eds.), pp. 99–134. Academic Press, New York.

Abbreviations of journal names should follow the style of *Chemical Abstracts Service Source Index*, 1985. Unpublished observations and personal communications should be cited in the *text* as such.

Proofs. Proofs will be sent to the author with a reprint order form. Authors will be charged for alterations in excess of 10% of the cost of composition.

Reprints. Fifty reprints of each article (without covers) will be supplied free of charge. Additional reprints may be ordered. A reprint form will accompany the proofs.

Brief Communications. Preliminary reports will be reviewed for prompt publication; however, the comments must be restricted to no more than five typewritten pages, including references, tables, and illustrations. No abstract should be included.

To facilitate the publication of manuscripts, especially those papers based upon a new, theoretical concept, the Editors invite each contributor to submit the names of at least three scientists who could review the submitted manuscript.
